Flygt Wear Kits

The easy way to cut your maintenance costs

Extended range of wear and repair kits for the hydraulic end of Flygt dewatering pumps

- **Lower price than individual parts**
– reduce your service costs for pump repair
- **Include all parts needed**
– minimize repair delays due to missing parts
- **Genuine parts only**
– secure reliability and trouble-free operation
- **Suitable for all repairs**
– different kits available for every type of repair

Engineered for life

Flygt Wear Part Kit

Flygt Hydraulic Repair Kit

Flygt Wear Part Kits and Hydraulic Repair Kits are available for a wide range of wear-resistant Flygt dewatering pumps. The kits ensure that you get the exactly right parts at a lower cost, and facilitate your handling and repair works.

The **Flygt Wear Part Kit** includes all parts needed for a common repair of a pump's hydraulic end.

Combined with the **Flygt Hydraulic Repair Kit**, it enables a complete repair of the hydraulic end. For a complete overhaul of the entire pump you also need the Flygt Basic Repair Kit (includes mechanical seals, bearings, O-ring kit)

Technical data

	Material
Impeller	Hard iron
Suction cover for 2600 series (Dura Spin™) for 2000 series	Hard iron Nitrile rubber
Diffuserer & O-rings	Nitrile rubber

Dura Spin™ technology

This technology is a part of the Flygt Wear Part Kit. Spiral grooves on the suction cover and back vanes on the impeller prevent abrasive particles from reaching the impeller neck.

Wear kits are available for the following Flygt dewatering pumps:

	2052.170*	2066.171*	2102.041*	2125.181*	2151.011*	2610.081/ 082/171	2620.081/ 082/171	2630.080/ 081/180	2640.080/ 081/180	2660.080/ 081/180	2670.080/ 081/180
